Subject: Re: FOI Request 30/01/22

Hello,
I believe that the deadline for response has passed. Could you please tell me when you plan on complying with the applicable legislation and respond back to me?
If I receive no response I will report this breach to ICO.
Michael

Subject: FOI Request 30/01/22

Hello,

I would like to request under FOI legislation all information, including: minutes, decision rationales, and associated with the following topic areas related to the proposed Tooting Triangle development.

1. when was the last time the floodlights were in use for the purpose of organised activity on the existing area? What was the purpose, and longevity of the lights being used? Where is the full explanation and impact assessment of light pollution on the common, given these floodlights have not been in use for years (probably close to a decade)? When did you consult Lambeth residents on this as we directly overlook this area? If you haven't, why not?
2. What dates have you formally consulted Lambeth residents who live on 2 of the 3 sides of the top of the common and are affected by this proposal? If you haven't, why not? I request all associated documentation
3. What formal impact assessment have you undertaken on pollution and parking effects on neighbouring Lambeth streets? When did you consult on this?
4. Why has Wandsworth council not performed any meaningful work on drainage in this area in recent years? Instead trying to link this to a commercial proposal? Who made the decision to de-prioritise this? I request all discussion documents associated with this.

I expect this information to be provided in full and in line with FOI legislation.

Michael
