In other words, please tell me how many home educated children last attended school x, how many last attended school y, and so on. - 3.The number of children of secondary school age recorded as CME: children missing education. Please provide data on the number of children referred to the local authority as CME either (a) in the middle of the academic year (mid-year) or (b) between years. For each of those categories, again provide data on schools recording pupils as CME, ie for each school, how many of the pupils currently recorded as CME came from that school, mid-year and between years.
- 4.How many of the secondary school age children either recorded as receiving home education or CME are known to have been on the child protection register. For clarity, I am not expecting this to be listed by school, to avoid Data Protection Act concerns: I Just want a global figure for your local authority.
- 5.The number of children of secondary school age placed in alternative provision. For each of these children, please provide data on the last school the child attended. In other words, please tell me how many of these alternative provision children last attended school x, how many last attended school y, and so on.

Request details: Alton Area Financial Model

page 143 of the Alton Area Masterplan Report October 2014 states that

"Scheme Viability

The Council's advisors, GVA, have reviewed the masterplan at each stage of its development.

A financial model tested viability and cashflow implications in line with infrastructure requirements and phasing.

Options, the Preferred Option and the Final masterplan have been subject to appraisal. The potential costs of acquisition have been considered. The costs of demolition construction and new development and public realm, community facilities, highways and utilities projects have been identified. Appraisals have been based on an assessment of property values and the potential receipts and revenue from development. The latter has considered market sales, shared ownership sales, and Council rental income from its own tenants".

Can the results of the financial model and the calculations that went into this financial model please be provided to us?

Page 12 states that

"An examination of the Alton area illustrates a series of socio-economic and market issues affecting the quality of life of the people who live there. There is a concentration of problems that distinguishes Alton from the surrounding neighbourhoods".

Can we please have details of how the 'socio-economic' and 'market' benefits of the regeneration will benefit the people of the Alton that currently reside there.
