

Initial Equality Impact Assessment – Service Change Option 3

Department	Children's Services, Policy and Development Division, Play and Extended Services
Service	Battersea Park Adventure Playground
People involved	Head of Service and Service Managers, Centre Staff, Service Users (children and young people and the parents that accompany them to the site)

1. What are the aims of the service and what changes are being proposed?

The Play and Extended Services Section provides a range of services that aim to support or secure better outcomes for children and young people as defined by Every Child Matters and articulated locally within the Children and Young People's Plan (CYPP). The Section provides a number of directly delivered services including Battersea Park Adventure Playground. This site currently offers children and young people (5-16yrs old) fun, adventurous, indoor and outdoor play opportunities after school, at weekends and during school holidays taking account the priorities within the CYPP. The service is currently offered free of charge and is fully staffed.

The proposed change relates to the introduction of an admission charge per child at peak times i.e. weekends, bank holidays, school holidays, with an option to extend this to off- peak times after school term-time. This is considered to be Option 3

2. What is the rationale behind these changes?

The Council faces a reduction in budget of £70 million by 2014. Each Department has scrutinised its services to ascertain if they can be delivered in different more cost effective ways and to see if they are still required.

3. What information do you have on the service and the potential impact of your service change in relation to the following?

	<p>List information you have. Do not put what the information shows you</p> <p>Information includes number of people using the service, customer satisfaction feedback on service, results of survey undertaken during Summer 2011 with adults accompanying children, and results of survey of unaccompanied children and young people undertaken during September 2011. Service registration forms</p>

Age	The services is for children aged 5 -16 years
Faith	Of those respondents completing the survey and demonstrated that 53% were Christian, 30% Other religion, 4% Muslim and then minimal respondents from the Hindu, Buddhist, Jewish and other religion.
Sexual Orientation	

4. Thinking about each group below please list the impact that the service change will have.

	<u>Positive</u> impacts of service change	Possible <u>negative</u> impacts of service change
Race	When asked what's the most important aspect of the playground BME groups far more likely than non BME to say "inside area and activities". Introduction of a charge could maintain staffing levels to deliver these activities.	Summer survey shows that BME groups more likely than White to reduce their use of the playground if charge introduced.
Gender	Female users when asked what was the most important aspect of the playground females were slightly more likely than males to state the "inside area and activities". Introduction of a charge could maintain staffing levels to deliver activities.	Female users were more likely to visit 'most days' and implementation of a charge could make frequent use less affordable and reduce attendance.
Disability	Only 29 respondents out of 964 stated that they had a disability and there were no key messages in respect of	Parents with disabilities may be reliant upon Disability Living Allowance and the introduction of a charge to use the site may

	the options being proposed.	make visits for their children less affordable.
Age	The service provides for children aged 0-5 years old with the majority of children engaged are aged 1-4 years. Only 1% of parent/carer users are teenagers.	
Faith	The proposed change would not positively impact on faith groups in any specific way	The proposed change would not negatively impact on faith groups in any specific way
Sexual orientation		No information provided

5. Is a full EIA required

The option supported by the Executive will be subject to further consultation which will feed into a full EIA that will be submitted alongside a final paper on Battersea Park Adventure Playground.

Comments - Please give the rationale here for not undertaking a full EIA

6. Through the initial EIA have you identified any actions that needed to be implemented to improve access to the service or monitoring of the service? (please list)
Further consultation on the preferred option
