# Wandsworth Housing and Regeneration Department 2021/22 Equalities Information Housing Advice / Homelessness / Provision of Temporary Accommodation

## **Introduction**

Part VII of the Housing Act 1996 as amended by the Homelessness Act 2002 sets out the duties owed by local housing authorities to people who are homeless or threatened with homelessness. Local Authorities have a duty to provide housing advice and assistance to everyone in their local area but the type of advice and assistance depends on whether the person is eligible for assistance (i.e. not subject to immigration control), whether they are actually homeless, whether they are intentionally homeless (they did or did not do something which caused their homelessness i.e. not pay their rent), whether they have a priority need for accommodation and local connection.

In April 2018 the Homelessness Reduction Act (HRA) came into force. Prior to the HRA much of the assistance provided to homeless applicants was predicated on whether after assessment a priority need was identified. A priority need included having dependent children, a disability and/or other instances of vulnerability. Those assessed as not having a priority need were less likely to be assisted. Within the HRA the emphasis on priority need has now been removed and all local authorities are expected to provide assistance in the form of prevention or relief of homelessness irrespective of the applicant's priority needs, if they are facing homelessness within 56 days of approach. Prevention is where an applicant is prevented from becoming homeless, such as the Council mediating with the landlord or host so that the applicant can remain in their accommodation. Relief is where reasonable steps are taken to relieve the applicant of their homelessness such as by helping them secure suitable accommodation of at least 6 months.

In order to monitor homelessness approaches and also local authority performance, the Department for Levelling Up, Housing and Communities (DLUHC) have a set of data requirements known as H-Clic which supersedes the previous P1E data returns. Whereas previously the data submitted to DLUHC was a snapshot of a local authority's homelessness cases at the end of each quarter, H-Clic covers all cases that the Council has dealt with and includes case-level details such as client name, gender, national insurance number etc. Such data is treated as mandatory within DLUHC's H-Clic Data Specification document.

### **Housing Advice Homeless Cases by Ethnic Group (2021-2022)**

		White	Mixed / multiple ethnic groups	Asian / Asian British	Black / African / Caribbean / Black British	Other	Unknown	Total
Hamalacs applications received	No.	774	176	303	790	236	616	2895
Homeless applications received	%	27.29%	6.08%	10.47%	27.29%	8.15%	21.28%	100%
Cases admitted into temporary	No.	305	70	142	332	111	259	1219
accommodation	%	25.02%	5.74%	11.65%	27.24%	9.11%	21.25%	100%
Decreation duty, access along d	No.	13	2	6	14	5	5	45
Prevention duty: cases closed	%	28.89%	4.44%	13.33%	31.11%	11.11%	11.11%	100%
Hamalace ages provented *	No.	28	7	7	25	1	8	76
Homeless cases prevented *	%	36.84%	9.21%	9.21%	32.89%	1.32%	10.53%	100%
Delief duty, each aloned	No.	40	12	22	39	14	60	187
Relief duty: cases closed	%	21.39%	6.42%	11.76%	20.86%	7.49%	32.09%	100%
Homeless cases relieved *	No.	66	11	21	47	18	37	200
	%	33.00%	5.50%	10.50%	23.50%	9.00%	18.50%	100%
Consequented duty to be use	No.	177	48	79	216	49	134	703
Cases accepted: duty to house	%	25.18%	6.83%	11.24%	30.73%	6.97%	19.06%	100%

<sup>\*</sup> these are cases where the Council has either prevented or relieved an applicant's homelessness by securing suitable accommodation of more than 6 months. These do not include all of the council's prevention schemes due to the availability of ethnicity data

In 2021/22, there was a 15% increase in the number of applications recorded by the Housing Assessment team which is likely due to high incidences of domestic abuse, and in such cases it is difficult to prevent homelessness.

In 2021/22, the number of households who were accepted as homeless was – in most instances - proportionate to the number of households presenting as homeless for each ethnic group. However, those from the White group received a smaller proportion of acceptances (25.18%) when compared to the number of homeless applications received (27.29%). The Black ethnic group had the greatest difference, representing 27.9% of applicants while contributing 30.73% of all accepted cases.

The Black ethnic group also had the second highest number of prevented cases, representing 32.89% of all homeless preventions.

The percentage breakdown of homeless applications across all ethnic groups has remained largely the same in 2021/22 when compared to 2020/21. The group with the largest difference is the other ethnic group, which represented 5.46% of all applications in 2020/21 and now represents 8.15% of all applications.

### Housing Advice and Homelessness Cases by Gender \*

		Female with Children	Female without Children	Male with Children	Male without Children	Total
Homeless applications received	No.	699	816	166	1214	2895
Homeless applications received	%	24.15%	28.19%	5.73%	41.93%	100%
Cases admitted into temporary	No.	376	342	82	419	1219
accommodation	%	30.84%	28.06%	6.73%	34.37%	100%
Prevention duty: cases closed	No.	11	17	2	15	45
	%	24.44%	37.78%	4.44%	33.33%	100%
Homeless cases prevented *	No.	30	28	2	16	76
Homeless cases prevented	%	39.47%	36.84%	2.63%	21.05%	100%
Relief duty: cases closed	No.	42	60	4	81	187
Relief duty. Cases closed	%	22.46%	32.09%	2.14%	43.32%	100%
Homeless cases relieved *	No.	47	59	5	89	200
nomeless cases relieved	%	23.50%	29.50%	2.50%	44.50%	100%
Coope accounted duty to have	No.	292	149	68	194	703
Cases accepted: duty to house	%	41.54%	21.19%	9.67%	27.60%	100%

<sup>\*</sup> each gender category represents the lead applicant (male or female), and each category may include joint applicants or spouses / partners

The largest gender group was male without children, representing 41.93% of all applicants, while representing 34.37% of all admissions into temporary accommodation. In contrast, females without children represented 28.19% of all homeless applications and 28.06% of all admissions into temporary accommodation, meaning that females without children are more likely to be admitted into temporary accommodation compared to males without children. A similar pattern can be observed in the number of homeless cases prevented, with males without children representing 21.05% of all homeless cases prevented, while females without children represent 36.84% of all homeless cases prevented.

Similar to previous years, female with children represented the largest group of accepted homeless cases (41.54%), and male with children also received a higher proportion of positive decisions (9.67%) when compared to the number of applications received (5.73%). This will almost certainly be due to their having a priority need due to dependent children.

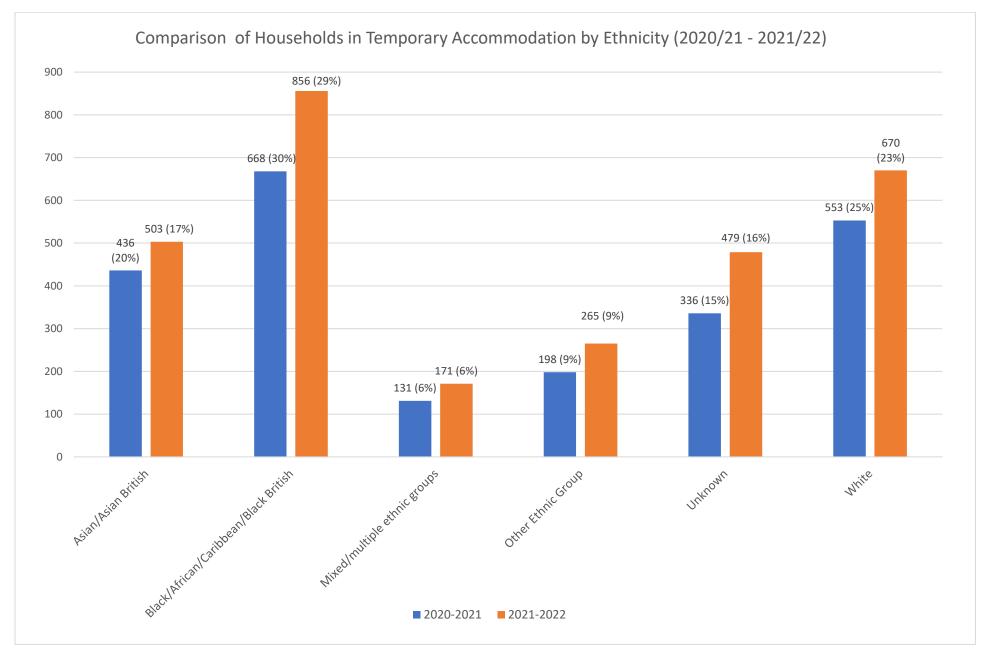

# **Households in Temporary Accommodation by Ethnic Group**

There has been a 4.3% increase in the number of households being placed into temporary accommodation when compared to the previous year (2,226 in 2019/20 to 2,322 in 2020/21). Similar to 2019/20, the black ethnic group remains the largest group accommodated (29%). This figure is much higher than the borough demographic as members of the black ethnic group constitutes approximately 10% of the population (Census, 2011). The white ethnic group is the second largest group accommodated, representing 24% of households in temporary accommodation.

Households in Temporary Accommodation *		White	Mixed / multiple ethnic groups	Asian / Asian British	Black / African / Caribbean / Black British	Other	Unknown	Total
2020/21	No.	553	131	436	668	198	336	2322
	%	24%	6%	19%	29%	9%	14%	100%
2021/22	No.	670	171	503	856	265	479	2944
2021/22		23%	6%	17%	29%	9%	15%	100%

<sup>\*</sup> this does not include households who have arranged temporary accommodation themselves (homeless from home cases)

As can be seen from the graph below, the distribution of ethnic groups that were placed in temporary accommodation is similar for the years 2019/20 and 2020/21. In keeping with the increase in placements being made all groups have increased in numbers with the exception of the other ethnic group, and the Asian ethnic group, which had a slight decrease in temporary accommodation placements.

## Households in Bed and Breakfast (not self-contained) Accommodation by Ethnic Group

The number of B&B placements has increased across all ethnic groups and the numbers of homeless cases have increased since COVID restrictions are no longer in place.

B&B (no	Households placed into B&B (not self-contained) by ethnic group		Mixed / multiple ethnic groups	Asian / Asian British	Black / African / Caribbean / Black British	Other	Unknown	White
2020/21	No.	35	3	10	23	4	18	93
2020/21	%	38%	3%	11%	25%	4%	19%	100%
2021/22	No.	27	3	9	16	4	26	86
	%	31%	3%	10%	19%	5%	30%	100%

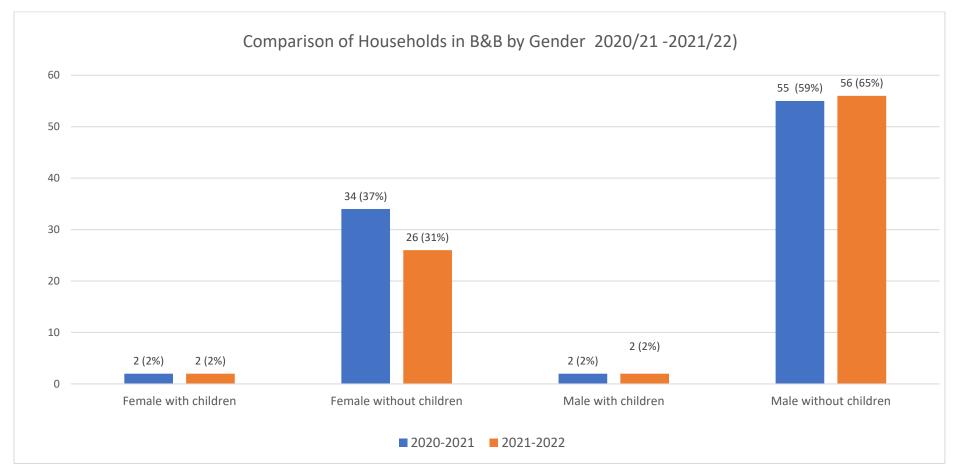

Where applicants are placed in B&B accommodation that is not self-contained, the largest proportion are in the white ethnic group at 38%, which is an increase from 26% in the preceding year. The number of B&B placements for the white ethnic group (38%) is disproportion to the number of overall temporary accommodation placements (24%). The next largest ethnic group placed into B&B accommodation is the black ethnic group at 25%, which is slightly under proportion when compared to the overall percentage of temporary accommodation placements (29%) for this group. For the Asian and other ethnic groups, the proportion of B&B placements (11%/4%) is significantly lower when compared to the cases admitted into temporary accommodation (19%/9%).

#### **Households in Temporary Accommodation by Gender**

Households in Temporary Accommodation		Female with children	Female without children	Male with children	Male without children	Total
2020/21	B&B (not self-contained)	2 (2%)	34 (37%)	2 (2%)	55 (59%)	93 (100%)
2020/21	Total	1092 (47%)	335 (14%)	433 (19%)	462 (20%)	2322 (100%)
2021/22	B&B (not self-contained)	2 (2%)	26 (31%)	2 (2%)	56 (65%)	86 (100%)
	Total	1310 (44%)	465 (16%)	475 (16%)	694 (24%)	2944 (100%)

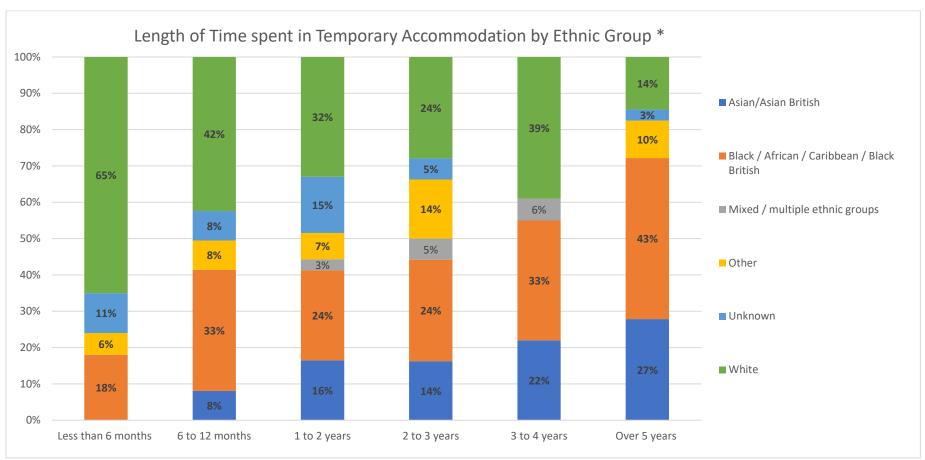

The largest proportion of applicants in any type of temporary accommodation are households with children. The combined total of these groups is 1,785 households which equates to 60.6% of all households placed into temporary accommodation, which is a slight decrease when compared to 2020/21's figure of 66%.

The graph below demonstrates the percentage of households in bed and breakfast accommodation across all gender groups.

The largest proportion of applicants accommodated in B&B that is not self-contained is households without children. A total of 82 out of 86 households make up this group which equates to 96% of the B&B placements. This is to be expected since B&B placements are only offered to households with children on a short-term basis if no other accommodation is available and this year continues to see an overall reduction in B&B placements.

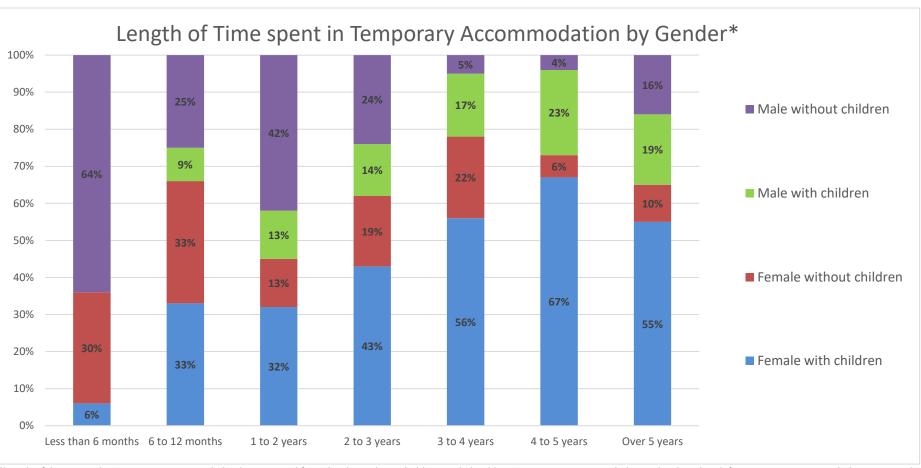

# **Length of Time Spent in Temporary Accommodation by Ethnic Group**

<sup>\*</sup> length of time spent in temporary accommodation is measured from the date a household was admitted into temporary accommodation to the date they left temporary accommodation as a result of being made a final offer of permanent accommodation

The white ethnic group represent the largest group for the least amount of time spent in temporary accommodation, representing 65% of those accommodated for less than 6 months, compared to 18% of those accommodated for less than 6 months for the black ethnic group. The black and Asian ethnic group represented 43% and 27% of households accommodated for over 5 years, compared to 14% households in the white ethnic group. However, households who have been in temporary accommodation for a substantial amount of time tend to require larger properties, which are in shorter supply and are in high demand, therefore leading to longer waiting times.

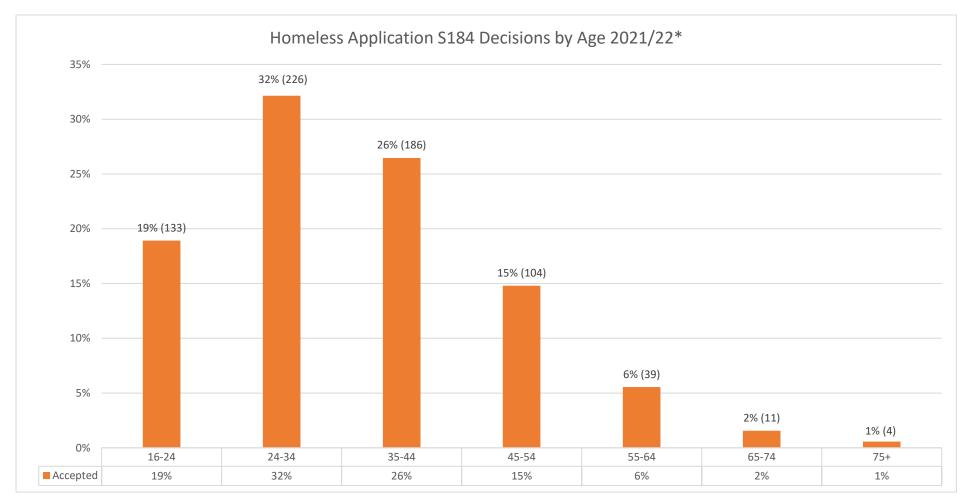

# **Length of Time Spent in Temporary Accommodation by Gender**

<sup>\*</sup>length of time spent in temporary accommodation is measured from the date a household was admitted into temporary accommodation to the date they left temporary accommodation as a result of being made a final offer of permanent accommodation

The group that spent the least amount of time in temporary accommodation were those groups without children, representing 94% of those applicants accommodated for 6 to 12 months. This is due to these households having more flexibility over permanent placements. Overall, females with children spent the most time in temporary accommodation, which is to be expected considering this is the largest group admitted into temporary accommodation and will often require larger accommodation.

#### **Homeless Decisions by age**

<sup>\*</sup>Age of applicant at date of decision notice

In 2020/21 the largest percentage of decisions issued were to the 25-34 and 35-44 age groups which equated to 58% of all section 184s served, which is similar to last year's figure of 54%. This is in proportion to the percentage of homeless approaches in these age groups, which account for 56% of all homeless approaches. No data is available for applicants who received negative section 184 decisions due to the very low number of these decisions currently being made.

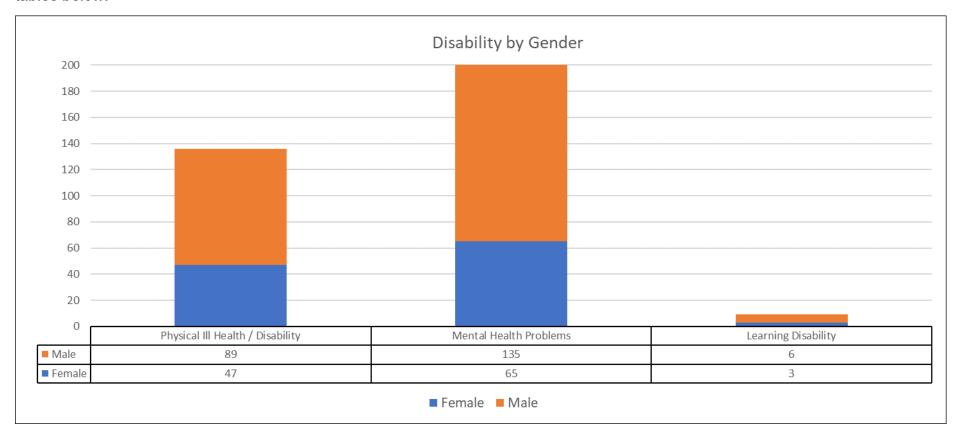

# **Accepted Housing Duty by Age**

Age	Accepted Housing Duty (2020/21)	Percentage of Accepted Cases	Accepted Housing Duty (2021/22)	Percentage of Accepted Cases	Direction of travel
16-24	107	17%	133	19%	<b>1</b>
25-34	208	33%	226	32%	•
35-44	157	25%	186	26%	1
45-54	101	16%	104	15%	•
55-64	42	7%	39	6%	•
65-74	10	2%	11	2%	_
75+	6	1%	4	1%	_
Total	631	100%	703	100%	

The total number of accepted section 184 decisions issued across all age groups in 2021/22 has increased by approximately 11% when compared to the previous year. The distribution of positive decisions by age group is similar for both years.

## **Disability**

Since the advent of the HRA in April 2018, there has been emphasis on local authorities to identify support needs of applicants' and/or household members. It should be noted that an applicant that has not had a disability identified during the initial HRA assessment may subsequently have a disability identified during the main duty assessment. These have been factored into the tables below.

The most common disability identified is for applicants who are experiencing mental health issues which account for 58% of all disabilities. Learning disability is the lowest identified disability, with 6 males and 3 females identified as having a learning disability.

## **Disability identified at HRA Assessment and Disability Confirmed at Main Duty**

Disability Identified at HRA Assessment	Female	Male	Total					
Dhysical III Health / Disability	No.	25	59	84				
Physical III Health / Disability	%	29.76%	71.24%	100.00%				
Mental Health Problems	No.	42	97	139				
Mental Health Froblems	%	30.22%	69.78%	100.00%				
Lograing Dischility	No.	2	4	6				
Learning Disability	%	33.33%	66.67%	100.00%				
Disability Confirmed at Main Duty *								
Dhysical III Health / Disability	No.	22	30	52				
Physical III Health / Disability	%	42.31%	57.69%	100.00%				
Mental Health Problems	No.	23	38	61				
Mental Health Problems	%	37.70%	62.30%	100.00%				
Lograing Dischility	No.	1	2	3				
Learning Disability	%	33.33%	66.67%	100.00%				
* not assessed as such at HRA Assessment								

The chart above shows the percentage breakdown of identified disabilities at HRA assessment and confirmed at main duty assessment. The majority of identified disabilities are found within male applicants who represent on average 67% of all identified disabilities. The majority of applicants have their disability identified during the HRA assessment.
