

16 August 2021

To the woman: **Naoual Margoum** who at times acts for the The Commons Team of
The Planning Inspectorate, **COM/3263104**

3A Temple Quay House

2 The Square, Temple Quay

BRISTOL, BS1 6PN

by email delivered on 16 August 2021

**In regard to no consent of i, to commercialisation to the property of i, and we,
of mankind: common land known as Tooting Triangle on Tooting Bec
Common (SW12 oPP)**

Greetings to the woman, Naoual Margoum;

i: the woman, birgit waiswa, write to you, in regard to the email you, did send to me on 28
July 2021 together with the applicant's response, "Response to PI - representations -
FINAL - 14 06 21": ten pages the woman: Joanna Shearman who at times acts as Leisure
and Culture Contract Manager for Wandsworth Council did write to you, on 14 June 2021;

i, say i, accept your invitation to attend and speak for five to ten minutes at a meeting with
you, and others about said applicant's response after today, 16 August 2021 when you
invite i, and said meeting takes place by way of an online meeting platform;

Number of comments you, did receive by we, of mankind

i, ask to this day, 16 August 2021, what is the **total** number of comments you, did receive
since December 2020 by we, of mankind in regard to the application with reference
number **COM/3263104**; of said total number, what is the number of comments through
which we, of mankind express **support** for commercial football pitches on the Tooting
Triangle; of said total number, what is the number of comments through which we, of
mankind express **no support** for commercial football pitches on the Tooting Triangle;

Access to common land

Open access to common land for all means open access to such land for all; in my correspondence to you on 20 April 2021, i, did ask how to fence off an entire area for use of only a few via an "online booking system" and "subsidised" or free "entry" to such fenced off area compares to the free access i, and we, of mankind have to the common land; on 20 April i, did ask you, provide evidence for any claim that you, might make how said fence, booking system and or entry restrictions maintain open access for all; i, do not see said evidence in the applicant's response of Joanna Shearer to you of 14 June 2021 - do you see it;

Harm by artificial grass

On 20 April 2021 i, did ask you, provide evidence for any claim that you, might make as to what effect artificial grass has on the health of i, others of mankind and or wildlife on the common land that surrounds the Tooting Triangle area and the effect on said common land, Earth itself; said evidence is to prove either that no transport of artifical grass off potential football pitches takes place by wind, rain, those of mankind who play football or in other ways and or said evidence is to prove that no harm comes to i, others of mankind, wildlife and or Earth by way of said transport of artifical grass to common land that surrounds the Tooting Triangle; i, do not see said evidence in the applicant's response of Joanna Shearer to you of 14 June 2021 - do you;

Bat report validity

i, ask does one year valid mean one year valid: what do you, say; Joanna Shearer mentions in her applicant's report that "this report was valid at the time the planning application was assessed"; if that is so, how come she did submit the planning application seven to eight months after the valid by date of the bat report; what effect does this delay have on your assessment for the planning inspectorate 18 months after the woman, Alison Fure who did write said bat report states in March 2019 that "the contents are valid for one year only", please see enclosure of evidence, in this instance Alison's bat report of March 2019: pages 1 and 3; i, ask you, what is true; i, ask: where is the evidence that bat and other wildlife habitat will not be affected by the potential football pits, in this instance by traffic increase every day to and from the Tooting Triangle, by noise that results from said traffic increase and or by the use of flood lights every evening for a significant part of the year;

Noise disturbance

Mankind:

i, require evidence that a company, in this instance TFC Leisure Ltd which Joanna Shearer in her applicant's response proposes to keep the peace does keep the peace, in this instance keeps noise to a minimum when those of mankind who work as police officers fail to keep the peace in recent times at Dr Johnson Avenue car park on Tooting Common, in this instance on Saturday nights:

i, ask you, ask the man: Anthony Walker who at times removes rubbish from the common land to witness how said car park looks on Sunday mornings with smashed bottles and other rubbish and how he does not receive the support he requires from Wandsworth Council in this regard during the recent months;

i, ask you, ask the man or woman who at times acts as police inspector and who is accountable to keep the peace why those of mankind who act as police officers do not keep the peace when we, of mankind who use Tooting Common or live near it require them to;

Joanna Shearer writes in her applicant's response that "operator TFC Leisure Ltd" is to "monitor and ensure" peace and "detriment minimisation"; i, ask what evidence did you, require from Joanna to prove that where police fails to keep the peace on common land, how a company is to achieve what those who work for government fail to achieve;

Wildlife:

In her applicant's response to you of 14 June 2021, Joanna Shearer writes "The most recently published, and relevant DEFRA research on the issue of noise impacts on biodiversity concludes *"the major finding is that a strong evidence base does not exist regarding the potential impact of anthropogenic noise on non-marine UK priority species or species of principle importance"*:

i, ask: where is said report Joanna mentions, who wrote it and what is his or her affiliation, whose interest does the man or woman who did write said report for the Department for Environment, Food & Rural Affairs represent, is it possible that mister or missus report writer experiences a conflict of interests between those of mankind who work for

corporations and aim to monetise Earth's resources for corporate gain and the interest of we, of mankind who strive to preserve life on this planet as our Creator did intend life to be; i, ask: can noise at certain levels cause stress to both, animals and we, of mankind; is or are there one or more other views compared to said report Joanna mentions;

Dark Skies

i, ask: are there currently floodlights in use on the Tooting Triangle at any point during the day and or evening and during which period of the year, if any; i, ask for i, walk on the Triangle since twenty years almost every evening and i, state did not see any use of flood lights not even on one occasion; i, require evidence that installation and use of new flood lights at the times and during the period proposed will not destroy some of the last dark skies in South London;

Thank you that you, did decide to invite to a meeting we, of mankind to discuss the plans for commercialisation of the Tooting Triangle by way of building semi-professional football pitches on common land;

Prior to said meeting, i, require your response to my three questions at the beginning of this correspondence with regard to the number of comments you, did receive by we, of mankind in regard to **application number COM/3263104**;

i, confirm, i, speak for five to ten minutes, depending on potential questions and or other interruptions when i, speak at said meeting you, invite i, to when it is held by way of an online meeting facility;

Kind regards,
