**Hello.**  
**We're Big Clean Switch.**

Big Clean Switch is part of Brakkn.

We're a B Corp, part of a global movement that is using business as a force for good.

**What is green energy?**

## What is green energy?

- Power generated from the elements
- 'Renewable energy', 'clean energy' and 'green energy' often used interchangeably
- Little impact in terms of climate change and air pollution.
- Not nuclear

How do green energy tariffs work?

---

One simple change with a big impact

Are green tariffs expensive?

---

**Switching your home  
is easy!**

## How it works

---

**1**

Grab a recent bill and pop the details into  
[bigcleanswitch.org](https://bigcleanswitch.org)

**2**

Pick your tariff and add a few more details to set up  
your new energy account

**3**

Put your feet up.

No interruption to your energy supply

No need for engineers' visits

You can switch your gas too

You don't have to have a smart meter if you don't want one

And don't forget...!

---

We have less than

# 10 years

to avoid catastrophic climate change. Switching your home or business to green electricity is one of the simplest, most impactful and immediate changes any of us can make to cut carbon emissions.
