Introduction

Surveys of all the local centres have been carried out in the Borough of Wandsworth on a biennial basis since 1988. The last survey was carried out in 2016. The survey collected information on all ground floor units within the protected frontages in the local centres. Details of the occupier, use and use class were collected enabling changes in the number of units and use class to be monitored over time. The local centre boundaries used in this report include all the shopping frontages detailed in the Council's adopted Local Plan, 2016. National Planning Policy (NPPF 2019) clarifies that the definition of town centres and town centre uses applies equally to local centres.

The information is broken down into Core Shopping frontages, Secondary Shopping frontages and protected Other frontages. This format enables the role of each shopping frontage to be monitored. Given their local role and catchments, retail (A1) uses in the Local Centres would be expected to concentrate on convenience (food) shopping, with comparison (non-food) shopping being concentrated in the town centres. Protected Core Shopping frontages are defined in the Council's Local Plan policies as being key areas in terms of shopping function, containing a high proportion of retail uses; protected Secondary Shopping frontages are defined as playing an important complementary shopping role, containing a mix of retail, non-retail and other services appropriate to a shopping frontage; the protected Other frontages are defined as playing a complementary shopping role - these frontages also contain a range of town centre uses. DMPD policies DMTS3-4 set minimum thresholds of 70% and 50% of A1 units being retained in Core and Secondary shopping frontages respectively and requires the remaining units to be an appropriate A class use, whilst policy DMTS5 protects Other frontages, supports complementary uses and requires that any proposed use must be an appropriate town centre use.

Use Classes Order

The use classes stated in the report are those identified in the Town and Country Planning (Use Classes) Order 1987, as amended. The A1 retail class is broken down into A1C (Convenience) units such as grocers, bakers, butchers, greengrocers, newsagents; A1D (Durable – also called comparison goods) such as clothes, electrical goods, furniture, DIY stores and A1S (Service) units such as hairdressers and photo processing shops. Vacant units are identified by their use class e.g. A1V is a vacant retail unit, A3V is a vacant restaurant/café and B1V is vacant office. Internet cafés are categorised as A1 in this report unless internet provision is ancillary to other uses. For example, a café with only a few computers would be classed as A3.

Permitted Development

Recent changes to Permitted Development rights have meant that fewer types of development now require planning permission. This includes change of use away from shops and related town centre uses to residential use and other uses such as schools. At the same time, national policy requires that sufficient shopping

facilities must be maintained to serve the needs of the local population and therefore certain permitted development rights for changes of use do not apply to identified key shopping parades - in Wandsworth these comprise the Core and Secondary shopping frontages, and Other frontages in town and local centres, and the Important Local Parades. The Council has also put in place [Article 4 Directions](#) to ensure that proposals affecting public houses and bars are subject to planning permission, and to restrict rights in the Core and Secondary shopping frontages and the Important Local Parades to change from a shop (A1 use) to a financial and professional services (A2) use. These came into force in August 2017. There is also an Article 4 Direction in place to resist change of use from office (B1a) to residential, which would affect the Other frontages where B1a is an acceptable use by introducing a residential use into a parade which is designed to support Core and Secondary Shopping frontages with complementary uses including those operating into the evening, and potential for future retail (A1) growth. This latter Article 4 Direction only came into force in May 2018. A degree of care must therefore be taken in interpreting policy performance shown in the survey results, as some changes of use may have occurred through permitted development.

The Local Centres

There are 9 local centres dispersed throughout the Borough, which together with the town centres and Important Local Parades provide easy access to day to day shopping facilities for the majority of residents and workers in the local catchment area. The information on local centres is broken down into Core Shopping frontages, Secondary Shopping frontages and protected Other frontages. This format enables the role of each shopping frontage to be monitored. Protected Core Shopping frontages are defined in the Council's Local Plan policies as being key areas in terms of shopping function and containing a high proportion of retail use; protected Secondary Shopping frontages are defined as playing an important complementary shopping role, containing a mix of retail, non-retail and other services appropriate to a shopping frontage; protected Other shopping frontages are defined as playing a subsidiary, complementary role, usually generating footfall. These frontages also contain a range of town centre uses compatible to the shopping function of the local centres. DMPD policies DMTS3-4 set minimum thresholds of 70% and 50% of A1 units being retained in Core and Secondary Shopping frontages respectively, and requires the remaining units to be an appropriate A class use, whilst policy DMTS5 protects Other frontages for complementary uses and requires that any proposed use must be an appropriate town centre use.

Interpreting the survey results

To improve the analysis of vacancy rates the surveys now monitor development activity of the units within the parades, as whilst these units are vacant, those that are being refurbished or fitted out for new owners demonstrate an opposite and positive result of investor confidence through committed take up and/or investment in units within the parades. Further analysis of vacancies, such as the location and length of time a unit has been vacant will also take place as part of the Local Plan Review in order to provide reliable evidence and to better

understand the economic trends taking place.

Headline Results

The local centres vary widely in size and function and have largely retained their level of retail use and low vacancy rates. There is a wide variation in the fortunes of these parades, but the combined survey results do help identify general trends.

Overall performance in terms of vacancy rates has been relatively constant at 11%. Individually the overall range varies widely from 4% to 27%. Earlsfield, Bellevue Road and Southfields Local Centres all demonstrate continued low vacancy rates, whereas Lavender Hill /Queenstown Road (partly in Lambeth) and Mitcham Lane Local Centres, whilst variable over the years, have had consistently high vacancy rates averaging at over 15%. These rates must be taken with a degree of caution - the statistical significance of these figure is influenced by the number of actual units in a centre. In addition, the current and imminent performance of the Roehampton Local Centre may reflect the redevelopment of the shops as part of the masterplan for the area and the programme of phased redevelopment and replacement.

The survey includes results from previous surveys since 2004 – this provides a more realistic picture of the policy performance and health of each centre, as the longer timeframe can ‘flatten out’ short term economic fluctuations, such as the 2008 financial crisis and current Brexit uncertainty. This will also identify the longer-term effects of the sectoral shift towards online shopping and growth of office and residential population in town centres and potentially any correlation between vacancies and CIL charges, rents and business rates.

The total number of units in all centres has remained steady at 563 units, 242 of these (43%) being in retail shop use (A1 use). Overall, the proportion of A1 uses has fallen gradually - from 57% in 2002 to 49% in 2016. This combination figure however includes Other frontages, where A1 retail use is not protected in favour of providing a range of town centre uses which are complementary to Core and Secondary Shopping frontages. The retail performance of individual parades and individual local centres vary widely, and may be a function of rental/business rate differentials, footfall, catchment or the types of A1 uses occupied. For example, some types of retail use are buoyant, such as coffee bars, delicatessens and convenience retail, notably small format supermarkets. Earlsfield has the highest proportion of A1 uses at 38%, followed by Southfields at 35% and Battersea Park Road at 34%. By contrast Bellevue Road and Clapham South Local Centres score the lowest proportion of retail shops at 17%, but the score may be reflected by the lack of Core Shopping frontages in these local centres, and by the large Tesco superstore located in the Lambeth part of Clapham South centre which may influence these figures. A1C (convenience) food shops are appropriate to the role of Local Centres in providing for the day to day needs of the area. The proportion of A1C uses has remained steady since 2014 - from 16% of all units to 15% in 2016 and 2018, but there has been a gradual decline over the longer term.

Whilst the proportion of vacant units does vary between the local centres (between 18% in Tooting Bec to 2% in Bellevue Road), the proportion of total vacancies across all local centres has been within the range of 9-12% since 2002, aside for an improvement to 8% in 2016. The combined vacancy rates for A1 shops remains low at 6% in 2018, and overall retail vacancy rates have been gradually reducing since 2002.

Food and Drink/Evening Economy

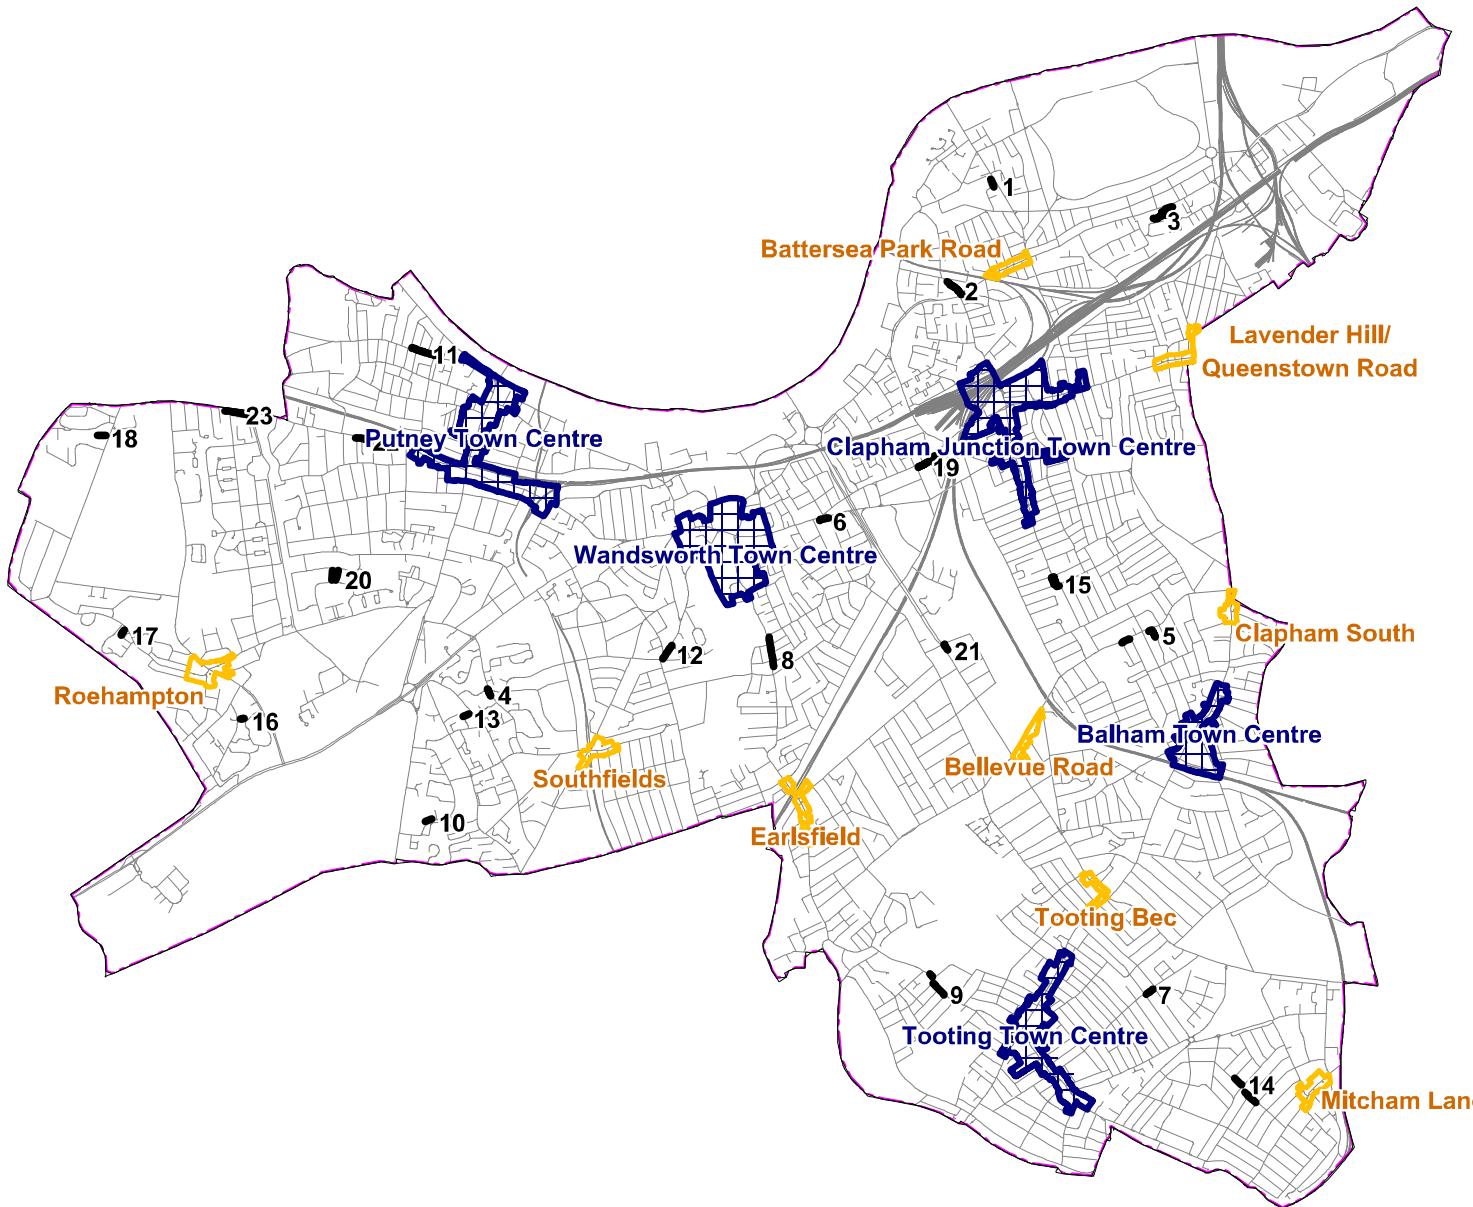

Whilst the retail sector and national high street retailers are undergoing a period of restructuring, uncertainty and competition from online trading, the food, drink and evening economy offer (A3-5 uses) shows some resilience, remaining at a steady combined rate of 20%-22% of all uses. A3-4 uses (food and drink, bars and pubs) have been recorded as a combined use in the Local Centre performance tables, with A5 uses (hot food takeaways) recorded separately. The survey results provide a snapshot of the performance and significance of this sector for each local centre, including the evening economy as a whole, and in comparison with the more traditional food shopping role of local centres. Whilst many pubs have closed in the last decade, those that do remain tend to offer meals, making the distinction between A3 restaurants and A4 pubs less clear in practice. Food and drink uses can support vitality and resilience in a centre against sectoral shifts between traditional high street shopping and online shopping, as they attract customers into the centre. These uses also tend to have longer trading hours including Sundays and into the evening, and are therefore a key part of the evening economy. Bellevue Road, Earlsfield and Lavender Hill/Queenstown Road Local Centres have the greatest composition of A3/A4 uses at 27%, 26% and 23% respectively, whilst Clapham South and Mitcham Lane have the lowest at 8%. No firm conclusions can be drawn from the proportion of A5 (hot food takeaway) uses which vary widely by centre (between 0% in Bellevue Road and 19% in Clapham South Local Centres).

Local Plan review

This report provides a snapshot of performance of the protected frontages in Local Centres against current Council policies DMTS3-5 which seek to protect parades for retail (A1) and complementary uses in the Town and Local Centres. Updated evidence on retail needs, town centres policy and strategies will be carried out as part of the full review of the Local Plan which is currently underway. Public consultation and progress are recorded on the [Council website](#). This will consider the town centres hierarchy, changes to boundaries and protected frontages, mix of uses, and the current and emerging role of Battersea Power Station as a new centre and shopping destination.

231 Wimbledon Park Road was incorrectly recorded as D2 in the 2006, 2008 and 2010 Local Centres Surveys. The use was reverted back to A2V for these years in the 2012 Local Centre Survey.

Unit 227 was added in 2014.

Units 227 and 229 had been amalgamated at the time of the 2016 Survey.
